FABIO OLDANI

Engineering at Polimeri Europa, eni

He is chemical engineer and graduated in 2005 at Politecnico di Milano. R&D experience in upstream flow assurance area: experimental and modeling on multiphase flow (sw OLGA), pipeline design and flow assurance analysis with E&P R&D unit and drag reducer agents degradation study (experimental and modeling). Process technologist in eni-EST pilot and CDP plant. Member of R&D group for construction of EST Sannazzaro plant (BASIC and FEED). EST reactor fluid dynamic experimental test of gas hold-up and foam formation in mock-up bubble column. Project leader for energy storage R&D projects (Environmental and energy photosplitting technology and Energy storage) and advanced biofuel process technologist.
