SHONALI PACHAURI

Senior Research Scholar, Energy Program at IIASA

Shonali Pachauri is currently Senior Research Scholar in the Energy (ENE) Program at the International Institute for Applied Systems Analysis (IIASA). She joined IIASA in 2005. Her research over the last decade has focused on the socioeconomic, demographic and environmental dimensions of household energy use in the developing world. In her present capacity she coordinates and leads research on analyzing heterogeneities in energy access and use in the developing world, policy pathways for achieving universal modern energy access, and assessing the wider impacts of this for sustainable development. Her broader research interests include the socioeconomic aspects of energy access, use and choice; resource use and access in relationship to lifestyles, poverty and development; energy access, demand and fuel choice modeling as well as the analysis of embodied energy of household consumption in developing countries.

Dr. Pachauri recently served on the Executive Committee of the Global Energy Assessment (GEA) and was Convening Lead Author for the chapter on Energy Access for Development. She is also author of over 30 journal publications, a book published by Springer, and several book chapters and policy reports. She is a member of the editorial board for the journal *Economics of Energy & Environmental Policy*. Dr. Pachauri has served as a reviewer for the Starters Grants of the European Research Council (ERC), the Swiss National Science Foundation (SNSF), the Social Sciences and Humanities Research Council of Canada (SSHRC) and the South Asian Network for Development and Environmental Economics (SANDEE). Prior to joining IIASA, she worked as a postdoctoral scholar with the Centre for Energy Policy and Economics (CEPE) at the Swiss Federal Institute of Technology Zurich (ETHZ). Her professional experience also includes three years of consulting with an Indian firm working on rural natural resource management projects.

Dr. Pachauri was awarded her doctorate from ETHZ in 2002 for her work on an energy analysis of household consumption in India. She also holds an MSc in Environmental and Resource Economics from University College London (UCL).
