MARJAN STOJILJKOVIC

Project Manager at Frankfurt School of Finance and Management

Marjan Stojiljkovic is Project Manager with a focus on Energy Efficiency and Renewable Energy Finance in developing countries. Since 2009, he has been responsible for the implementation of three KfW Energy Efficiency and Renewable Energy facilities in South-East Europe's commercial banks, as well as several other EE lending projects from other organizations. Besides overall coordination and management of projects, his tasks include performing detailed market analysis, structuring of financial products for energy efficiency and renewable energy finance, investment pipeline development, training of bank staff in EE/RE lending, facility marketing, and monitoring and reporting activities. Mr. Stojiljkovic has good understanding of energy market developments and policies, and has experience in conducting research studies and designing study approaches.

Mr. Stojiljkovic is furthermore involved in developing and implementing the UNEP Climate Finance Innovation Facility (CFIF) projects in Southeast Asia, with a focus on China and Indonesia. More specifically, his practical experience involves structuring and implementing detailed feasibility studies including market analysis, structuring of technical assistance and on-site activities. He is equipped with ability to both manage the project implementation team and individually participate as sustainable energy finance expert or trainer. He is fluent in English, German and Serbian.
